

1

Go to the MBFD Hub

Open www.mbfdhub.com. Scroll to the bottom of the homepage and select the Operational Forms card.

2

Sign in

Enter your Employee ID and password. The Forms library opens under your employee account.

3

Start the F-ROC

Under Start a form, find F-ROC Daily Activity Report and select Create form.

4

Complete each section

Enter General information and Team members. Add Labor, Equipment, Mileage, Materials, and Certification details that apply. Leave sections blank when they do not apply.

5

Use AI-assisted import (optional)

In General information, open Optional: Import activity notes with AI. Enter the unit designation, then paste notes or upload a WhatsApp .txt/.zip export. Select Analyze and add to form. Review every added or estimated value and correct anything needed.

6

Save and review

The form autosaves. You can also select Save now. Move through every section and confirm names, dates, 24-hour times, mileage, totals, and certification.

7

Complete the form

Select Generate PDF. Correct any highlighted missing information, then generate again. When ready, use View / print or Download. A generated PDF marks the record Completed; later edits return it to Draft until a new PDF is generated.

Important

AI suggestions are editable assistance—not final approval. Verify every value before generating the PDF. Never paste your password into the activity-notes box.
