

Mid-Mount Ladder Work Group

Final Review Teams Meeting Itinerary

Date: March 18, 2026

Time: 10:00 AM

Platform: Microsoft Teams

Purpose: Final review of findings, discussion of concerns, and selection of top choices for recommendation

“Today’s objective is to review the final findings, address any remaining concerns, and leave this meeting with a clear recommendation on the top equipment choices for the Mid-Mount Ladder project.”

Suggested Meeting Flow

10:00 – 10:05 AM | Start

- Welcome members
- Confirm attendance
- State meeting purpose: final review, questions, discussion, and decision-making
- Remind members the goal is to leave with clear top selections or a defined path to final selection

10:05 – 10:15 AM | Administrative Overview

- Brief recap of the work group process across five sessions
- Confirm categories reviewed:
 - Forcible Entry Tools
 - Battery-Operated Extrication Tools
 - Vehicle Stabilization

- Confirm that evaluation data, product files, and executive findings were reviewed in advance

10:15 – 10:30 AM | Executive Summary of Findings

- Present the high-level evaluation summary:
 - 11 evaluators
 - 20 products
 - 115 submissions
- Emphasize major evaluation themes:
 - Reliability
 - Ease of use
 - Performance in operational conditions
- Note that some products had strong scores but also raised deal-breaker concerns tied to safety or operational limitations

10:30 – 10:45 AM | Forcible Entry Tools Review

- Review top findings
- Discuss leading choice and any remaining concerns
- Recommended talking points:
 - Dewalt 12-inch cut-off saw led this category
 - T1 generated concern due to documented deal-breaker issues
 - Husqvarna and Makita remained in closer secondary competition

10:45 – 11:10 AM | Battery-Operated Extrication Tools Review

- Review top scoring spreaders, cutter, and ram

- Focus on operational fit for the ladder truck mission
- Recommended talking points:
 - Holmatro battery spreader and ram scored at the top of this category
 - Hurst also performed strongly, especially in the spreader group
 - Confirm whether the committee is aligned on top brand/tool preference or needs brand-by-brand final discussion

11:10 – 11:25 AM | Vehicle Stabilization Review

- Review stabilization recommendations
- Recommended talking points:
 - Holmatro Vehicle Stabilization Strut scored strongest
 - OmniShore performed well but had a documented deal-breaker concern
 - Paratech Strut Driver remained a finalist and should be discussed for application fit

11:25 – 11:40 AM | Open Member Discussion / Questions

- Allow each member time to raise concerns
- Address disagreements or unresolved operational issues
- Keep discussion centered on:
 - Safety
 - Simplicity of deployment
 - Compatibility with ladder company operations
 - Maintenance / support implications
 - Space and apparatus fit

11:40 AM – 12:00 PM | Final Deliberation and Consensus

- Confirm final top choices by category
- Identify any items needing further pricing, demo follow-up, or clarification
- If full agreement is not reached, define exactly what remains unresolved and who owns each follow-up item

12:00 PM | Closing

- Summarize decisions made
- Confirm next steps
- Assign responsibility for final recommendation package / memo / procurement submission

Administrator / Host Notes

- Open the Teams room **10–15 minutes early**
- Have the agenda, executive summary, and product comparison materials ready to share on screen
- Keep one person designated as:
 - **Meeting lead**
 - **Timekeeper**
 - **Note taker**
- Ask members to hold side issues until the open discussion block unless urgent
- Keep discussion tied to **final operational suitability**, not general preference
- If discussion stalls, bring the group back to:
 - Which option best supports mission performance?

- Which option presents the fewest operational concerns?
- Which option can be defended to command staff and procurement?

Recommended Meeting Ground Rules

- One speaker at a time
- Keep comments concise and operationally relevant
- Distinguish between preference and documented concern
- Focus on reaching a recommendation, not reopening the full evaluation process
